ACCUDRAW 17X 174C

Synthetic Water Soluble Drawing Fluid

DESCRIPTION

ACCUDRAW 17X 174C is a yellow liquid soap which has exceptional slip for a water soluble lubricant. It wets out evenly on all metals, giving a uniform continuous film; whereas standard soluble oils and soap pastes tend to contract into droplets when in contact with metal. It mixes instantly with hot or cold water. **ACCUDRAW 17X 174C** is formulated with a rust preventive for indoor storage.

ACCUDRAW 17X 174C can be safely recommended for stamping and drawing for steel, aluminum and brass. Because **ACCUDRAW 17X 174C** wets metals better and gives a uniform, continuous and slippery film, it also will yield better draws and longer die life. It can be used straight or mixed with up to 5 parts of water, depending on the difficulty of the job. It can be applied by any conventional method except a circulating system. Because it is a soap, it will foam with the agitation of a circulating system.

ACCUDRAW 17X 174C can be removed from parts with hot water or alkaline cleaners. Solvents or vapor degreasing are neither necessary nor effective.

PHYSICAL PROPERTIES

Appearance	Clear yellow
Consistency	Thick
Diluent	Water
Odor	Nil
