SPRAY CLEANERS

MIRAGE EZ-225: Liquid, highly alkaline, silicate and phosphate free. A suggested product for cleaning ferrous metals, nickel clad stock and coppers. Heavy duty spray wash cleaner.

MIRAGE EZ-451: Liquid, highly alkaline Ultrasonic cleaner for removal of metal forming/machining lubricants and provides limited corrosion protection of the cleaned work.

POWERCLEAN EZ-600: Powdered, mildly alkaline Ultrasonic cleaner for removal of metal forming/machining lubricants and provides limited corrosion protection of the cleaned work.

MIRAGE EZ-606B: Liquid alkaline for cleaning all metals including galvanized stock. Principle application: shops that process a variety of metals through one line.

MIRAGE EZ-607: Liquid, moderately alkaline, for cleaning all metals. Principle applications: heavy duty cleaner may also be used on strip lines. A suggested product for cleaning copper and copper alloys.

POWERCLEAN PAL-2: Liquid, highly alkaline for cleaning all metals except aluminum and zinc die castings and galvanized stock. Suggested for cleaning heavy oils/drawing compounds from steels where high spray pressures are used.

POWERCLEAN 1422: Liquid, alkaline for cleaning all metals.

POWERCLEAN 991N: Liquid, alkaline, for cleaning all metals, Recommended where "free board" of cleaner tank is almost non-existent.

MIRAGE: Liquid, mildly alkaline for cleaning all metals. Mirage suggested as an "in-process" cleaner for removal of drawing/forming lubricants from aluminum and steel.
