

Form Oil 401

Description

FORM OIL 401 is a light viscosity concrete form release oil.

Due to its light viscosity, it can be easily spray applied or swabbed onto forms. The specially blended chemistry of **FORM OIL 401** provides better film strength and less buildup on forms than straight solvent type form release products.

FORM OIL 401 provides excellent release characteristics, minimal residue on molds and is non-staining to concrete. A light coating will cover approximately 500 square feet per gallon.

FORM OIL 401 is not a hazardous material and does not carry a flammable or combustible warning and can be disposed of as you would a used mineral oil.

Technical Data

Appearance	Clear Pale Yellow Liquid
Density @ 60F	6.98
Color ASTM	1.0
Odor	Slight Petroleum
Viscosity @ 40C.,cst.	13.86

Safe Handling and Storage

Instructions

Before handling and using, the Safety Data Sheet should be read and understood by all personnel in contact with this product.

Disposal

Any disposal of this product should be in compliance with all federal, state and local regulations. All industrial solutions may require some treatment before discharge. DuBois offers full service disposal and compliance consultation, backed by a full range of treatment chemicals. Detailed information is available from your DuBois Representative.

Precautions

KEEP OUT OF THE REACH OF CHILDREN.

Please refer to the label and Safety Data Sheet information for all warnings, recommendation for safety equipment, and other regulatory information. Copies of the Safety Data Sheet information can be ordered by calling 800 438 2647.
