

Pallet Lube 205

Chemical for Concrete Production Equipment

Description

Pallet Lube 205 is a non petroleum based, water soluble release agent. It is a release agent for the top ring, spindle and pallet of a pipe machine.

Pallet Lube 205 is a blend of fatty soap, surfactants and wetting agents formulated to create a smooth, slippery barrier between the metal surface of the pallet and the concrete. On a pallet turning machine, the action of the turner tends to increase the effectiveness of this barrier. It is a non-flammable water based product that also could be used as a synthetic concrete forming fluid.

Technical Data

Appearance:	Clear Liquid
Color:	Amber / brown
Specific Gravity, @60°F:	1.00
Density, lbs/gal, @60°F:	8.34
Boiling Point, °F:	212

Use Instructions

After cleaning the pallet thoroughly, apply a light coating of **Pallet Lube 205** (straight) with the use of a brush, pad, roller or rag. Before the next application, a light pass with steel wool is useful. For certain applications, **Pallet Lube 205** may be diluted 1:1 with water.

Safe Handling and Storage Instructions

Before handling and using, the Safety Data Sheet should be read and understood by all personnel in contact with this product.

Disposal

Any disposal of this product should be in compliance with all federal, state and local regulations. All industrial solutions may require some treatment before discharge. DuBois offers full service disposal and compliance consultation, backed by a full range of treatment chemicals. Detailed information is available from your DuBois Representative.

Precautions

KEEP OUT OF THE REACH OF CHILDREN. Please refer to the label and Safety Data Sheet information for all warnings, recommendation for safety equipment, and other regulatory information. Copies of the Safety Data Sheet information can be ordered by calling 800 438 2647.
