VANISHING OILS

AccuDri 1924 A water white, odorless, non-staining, non-corrosive and non-toxic oils. It is normally applied by felt wipers or rollers in contact with the strip. Contains Phosphorus.

AccuDri 2889 A water white, odorless, non-staining, non-corrosive and non-toxic oils. It is normally applied by felt wipers or rollers in contact with the strip. Chlorinated.

AccuDri 4706 Used as received for stamping and blanking light gauge metals. The lubricity agent provides surface wetting and freedom from abrasion and pick up while the solvent carrier provides necessary cooling. With total solvent evaporation work pieces are virtually free of product residue and do not require cleaning.

Cool Lube 02 A water white, odorless, non-staining, non-corrosive and non-toxic oil. It is formulated with a volatile carrier and a lubricity agent. The lubricity agent provides surface wetting and freedom from abrasion and pick up while the solvent carrier provides necessary cooling. With total solvent evaporation work pieces are virtually free of product residue and do not require cleaning.
